

GINGOOG CITY GOVERNMENT EMPLOYEES ASSOCIATION

System Development and Implementation Proposal

GCGEA Membership, Loan and Benefits Management System (GCGEA MLBMS)

Prepared for: [CLIENT / ORGANIZATION NAME]

Prepared by: [SERVICE PROVIDER / DEVELOPER NAME]

Proposal date: August 10, 2026

Valid until: September 9, 2026

1. Executive Summary

This proposal covers the configuration, implementation, deployment, turnover, and initial support of the GCGEA Membership, Loan and Benefits Management System. The solution is a centralized, role-based web application designed to manage the association's membership, contributions, loans, benefits, payroll deductions, financial transactions, approvals, and management reports.

The platform uses a modern React interface, Laravel application programming interface, and relational database. It is designed to reduce duplicate encoding, improve transaction traceability, standardize approval procedures, strengthen access control, and provide timely management information.

Project objective: Deliver a secure, maintainable, and production-ready information system that consolidates key operations and provides accountable, auditable records.

2. Project Objectives

- Centralize member and transactional records in one controlled system.
- Automate recurring calculations, validations, approval routing, and document generation.
- Provide role-based access and a complete audit trail for sensitive activities.
- Improve reporting accuracy through consistent data capture and downloadable reports.
- Support continuity through backups, monitoring, and maintainable deployment practices.

3. Functional Scope

- Membership Management — registration, profiles, employment details, beneficiaries, documents, archives, and member import.
- Contribution Management — individual and bulk posting, payroll deductions, contribution funds, monthly dues, and history.
- Loan Management — applications, eligibility, approval workflow, release, payment schedules, collections, reloan, and statements.
- Benefits Management — applications, eligibility, approval, release, check preparation, benefit types, and member history.
- Payroll Deduction Management — spreadsheet import, validation, conflict resolution, manual/bulk entry, posting, and rollback history.
- Financial Management — annual budgets, disbursements, direct payments, cash flow monitoring, and financial statements.
- Reports and Exports — operational and financial reports with PDF, Excel, CSV, preview, and print-ready outputs.
- Administration and Governance — users, roles, permissions, approval workflows, audit logs, notifications, settings, and backups.

4. Core Deliverables

- Configured production web application and Laravel backend API.
- Production database schema, initial configuration, and access-control setup.
- Deployment to the agreed server environment and domain configuration.
- Standard report templates and PDF/Excel export capability.
- Administrator orientation, key-user training, and turnover session.
- Basic user/administrator documentation and deployment notes.
- Ninety (90)-day defect warranty beginning from formal acceptance.

5. Commercial Proposal

Description	Amount
System Development, Configuration, and Implementation	₱310,000.00
Server Infrastructure — Year 1	₱40,000.00
Domain Registration — Year 1	₱1,500.00
TOTAL INITIAL IMPLEMENTATION	₱351,500.00

Renewable Maintenance and Technical Assistance: ₱90,000.00 per year, equivalent to ₱7,500.00 per month or ₱22,500.00 per quarter. The maintenance term begins after the included 90-day warranty unless otherwise agreed in writing.

The server and domain fees are payable before procurement or activation. Recurring infrastructure charges are subject to the provider’s renewal pricing and any approved capacity upgrades.

6. Warranty

A 90-day warranty is included after formal system acceptance. The warranty covers reproducible defects in delivered functions. It does not include new requirements, scope changes, client data correction, third-party outages, or issues caused by unauthorized modifications.

7. Annual Maintenance and Technical Assistance

- Remote technical assistance during regular office hours.
- Correction of reproducible software defects and production issues.
- Application, dependency, and security updates compatible with the existing architecture.
- Server, database, storage, scheduled job, and backup health monitoring.
- Minor report, label, configuration, and user-interface adjustments.
- Deployment assistance and quarterly system health review.
- Up to eight (8) pooled technical-support hours per month.
- Critical incident response for verified system unavailability.

Service expectations

Priority	Example	Initial response target
Critical	Verified production system unavailable to all users	Within 4 business hours
High	Major function unavailable with no reasonable workaround	Within 1 business day
Normal	Minor defect, assistance, or configuration request	Within 2 business days

Response targets refer to acknowledgment and initial assessment, not guaranteed final resolution.

8. Exclusions and Change Requests

- New major modules, extensive workflow redesign, mobile applications, and third-party integrations not stated in scope.
- Bulk data encoding, historical-record cleansing, or correction of inaccurate client-supplied data.
- Third-party subscriptions, SMS/email charges, hardware, internet service, and fees beyond the stated server/domain allocation.
- On-site services, travel, accommodation, and after-hours work unless separately authorized and quoted.
- Damage caused by unauthorized source-code/database changes, unsupported hosting modifications, malware, or credential sharing.

Requests outside the agreed scope will be documented, estimated, and implemented only after written approval of a separate quotation or change request.

9. Client Responsibilities

- Designate authorized project representatives and users for validation and acceptance.
- Provide accurate source data, policies, report samples, branding assets, and timely decisions.
- Review deliverables and submit consolidated feedback within agreed review periods.
- Maintain appropriate user-account practices and protect administrator credentials.
- Pay approved fees according to the agreed commercial terms and renewal schedule.

10. Ownership, Confidentiality, and Data

Client operational data remains the property of the client. Source-code ownership, reuse rights, repository access, and restrictions shall follow the final signed agreement. Both parties shall protect confidential records and use access only for authorized implementation and support activities.

11. Proposal Validity and Acceptance

This proposal is valid until September 9, 2026. Final implementation dates begin upon receipt of signed acceptance, notice to proceed, required initial payment, and necessary project information.
